A simple and reliable 3-step user journey

Back to work

Open up businesses with confidence

It's time to fuel industry regrowth with international business travel and safe reopening of offices and workplaces.

- Ensure businesses can thrive again by using testing solutions to reduce risk and increase freedom
- Enable visitors and staff to verify their health status so businesses can reopen, and remain efficient whilst ensuring risk and safety initiatives are compliant.
- Never compromise on privacy of staff or visitors personal medical information in order to understand their health status

Return to education

Learning without compromise

It's time to put education at the forefront of the recovery with international student travel and safe reopening of schools, colleges and universities.

- Ensure education establishments can thrive again by using testing solutions to reduce risk and increase freedom
- Enable students and staff to verify their health status so educational establishments can reopen, and remain efficient whilst ensuring risk and safety initiatives are compliant
- Never compromise on privacy of students or staff personal medical information in order to understand their health status

Events for all

Attend sports events and entertainment anywhere

It's time to bring back sports, events and entertainment safely, here's how to support that.

- Ensure that sports, events and entertainment can thrive again by using testing solutions to reduce risk and increase freedom to attend and travel to them
- Enable attendees and staff to verify their health status so events establishments can reopen, and remain efficient whilst ensuring risk and safety initiatives are compliant
- Never compromise on privacy of attendees or staff personal medical information in order to understand their health status
